Making Sense of Field Research Sheila Pontis 2018-07-17 Learn how to use field research to bring essential people-centred insights to your information design projects. Information design is recognized as the practice of making complex data and information understandable for a particular audience, but what's often overlooked is the importance of understanding the audience themselves during the information design process. Rather than rely on intuition or assumptions, information designers need evidence gathered from real people about how they think, feel, and behave in order to inform the design of effective solutions. To do this, they need field research. If you're unsure about field research and how it might fit into a project, this book is for you. This text presents practical, easy-to-follow instructions for planning, designing, and conducting a field study, as well as guidance for making sense of field data and translating findings into action. The selection of established methods and techniques, drawn from social sciences, anthropology, and participatory design, is geared specifically toward information design problems. Over 80 illustrations and five real-world case studies bring key principles and methods of field research to life. Whether you are designing a family of icons or a large-scale signage system, an instruction manual or an interactive data visualization, this book will guide you through the necessary steps to ensure you are meeting people's needs.

A Woman to Deliver Her People James K. Hopkins 2014-05-12 The Second Coming of Christ has been prophesied many times through the centuries but seldom by a figure so fascinating as Joanna Southcott (1750–1814), the domestic servant who at the age of forty-two declared that God had chosen her to announce His return. A Woman to Deliver Her People is the most comprehensive study of this remarkable woman and her movement yet written. Dramatic social and political changes of the late eighteenth century--among them the revolutions in America and France--had a profound effect on the attitudes of English men and women at all levels of society. With events so far outside the range of ordinary experience, both the educated and the uneducated turned to the prophetic books of the Bible, seeking solace and explanation. A number of prophets and prophetesses appeared, claiming to have a special understanding of the biblical texts and offering startling new revelations which had been disclosed to them by God. The greatest and most influential of these was Joanna Southcott, who attracted tens of thousands of followers from the West Country, London, the Midlands, and the industrial North. Her "spiritual communications" filled some sixty-five books and pamphlets from 1801 until her death. Most contemporary observers dismissed Southcott as a fanatic, and she was frequently the subject of caricature and ridicule. James Hopkins attempts to remedy this distortion by examining Southcott's life and the millenarian movement she led within the context of the social, political, and economic crises of the period. By tracing the psychological and popular roots of Southcott's piety, and casting her appeal against the backdrop of a revolutionary age, Hopkins not only vividly portrays the life of this fascinating woman but also offers a new perspective on the mentality of ordinary English men and women during the years of their transformation into a working class.

Immunization Stuart Blume 2017-08-15 One of the most important tools in the public health arsenal, vaccines are to thank for the global eradication of smallpox, and for allowing us to defeat the dire threat of infectious disease for more than one hundred years. Vaccine development is where scientists turn when faced with the frightening spread of new diseases like Zika, SARS, and Ebola. So if vaccines have proven to be such an effective tool, why are growing numbers

of people questioning the wisdom of vaccinating children? Why have public-sector vaccine producers almost vanished? And can we trust the multinational corporations that increasingly dominate vaccine development and production? In this highly original and controversial new book, Stuart Blume argues that processes of globalization and unmet healthcare needs are eroding faith in the institutions producing and providing vaccines. He brings together short, readable histories of immunization practices over the past century, from the work of early pioneers such as Louis Pasteur and Robert Koch to the establishment of the World Health Organization and the introduction of genetic engineered vaccines. Focusing on today's "vaccine hesitancy," the book exposes the inadequacies of public health persuasion, and discusses what will be needed to restore parents' confidence. This is a timely history, one that not only sheds new light on the origins of our global vaccine crisis, but also points a way forward.

Engineering for Human-Computer Interaction Stéphane Chatty 1999-08-31 The aim of IFIP Working Group 2.7 (13.4) for User Interface Engineering is to investigate the nature, concepts and construction of user interfaces for software systems. The group's scope is: · developing user interfaces based on knowledge of system and user behaviour; · developing frameworks for reasoning about interactive systems; and · developing engineering models for user interfaces. Every three years, the group holds a "working conference" on these issues. The conference mixes elements of a regular conference and a workshop. As in a regular conference, the papers describe relatively mature work and are thoroughly reviewed. As in a workshop, the audience is kept small, to enable in-depth discussions. The conference is held over 5-days (instead of the usual 3-days) to allow such discussions. Each paper is discussed after it is presented. A transcript of the discussion is found at the end of each paper in these proceedings, giving important insights about the paper. Each session was assigned a "notes taker", whose responsibility was to collect/transcribe the questions and answers during the session. After the conference, the original transcripts were distributed (via the Web) to the attendees and modifications that clarified the discussions were accepted.
