Expressions of Mercy Helen Gregory 2006 Told against a backdrop of social and political changes as well as modern church developments, this history of the seven internationally renowned Mater Misericordiae hospitals reveals an integral chapter in the medical history of Queensland. From the gestation of the hospitals in the minds of the Sisters of Mercy through the system's rise to eminence in health care—one in six Queenslanders was born at a Mater hospital—this 100-year document will remind millions of patients, nurses, and doctors of the hospitals' touching, high-quality approach.

Health Services Assistance Kathryn Austin 2017-11-24

Achieve high standards in patient-focused care. Health Services Assistance provides complete coverage of core and elective units for assisting in nursing work in acute care. Exercises throughout the text provide students with the means to self-assess and extend their skills and knowledge. Foundation skills are developed early, underpinning understanding of the specialist acute care chapters that follow. Students are encouraged to reflect and contextualise their learning and to practise techniques in small groups. Activities break up the material so information is easier to retain. Self-check, extension activities and discussion questions can be incorporated into an institution's assessment strategy. Health Services Assistance is structured by competency for HLT33115 Certificate III in Health Services Assistance, supporting nursing in acute care, and is packed with specific cases and examples, as well as including additional content on palliative care and mental health. Each chapter addresses a competency, with a volume of learning that underpins the assessment requirements. The book is structured so that elements and criteria are communicated by the section headings. Teach following the qualification structure, using the print book, eBook or LMS integration.

Emergency and Trauma Care for Nurses and Paramedics -

eBook Kate Curtis 2019-07-30 Endorsed by the College of

Emergency Nursing Australasia CENA is the peak

professional association representing emergency nurses

and has endorsed this text in recognition of the

relevance it has to emergency nursing across

Australasia. Led by an expanded editorial team of internationally recognised clinicians, researchers and leaders in emergency care, the 3rd edition of *Emergency and Trauma Care for Nurses and Paramedics* continues to be the foremost resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary emergency care. The text provides nursing and paramedicine students and clinicians with the opportunity to understand the best available evidence behind the treatment that is provided throughout the emergency care trajectory. This unique approach ultimately seeks to strengthen multidisciplinary care and equip readers with the knowledge and skills to provide safe, quality, emergency care. The 3rd edition builds on the strengths of previous editions and follows a patient journey and body systems approach, spanning the pre-hospital and hospital environments. Additional resources on evolve eBook on VitalSource Instructor resources: PowerPoint slides Test bank Paramedic test bank Case study questions and answers Image collection Additional case studies with answers and rationales Additional paramedic case studies with answers and rationales Student and Instructor resources: Additional case studies Additional paramedic case studies Videos Expanded editorial team, all internationally recognised researchers and leaders in Emergency Care Chapter 6 Patient safety and quality care in emergency All chapters revised to reflect the most up-to-date evidence-based research and practice Case studies and practice tips highlight cultural considerations and communication issues Aligns to NSQHSS 2e, NMBA and PBA Standards An eBook included in all print purchases

Requirements for the Retention of Laboratory Records and Diagnostic Material Department of Health and Ageing Staff 2009 "This is the fifth edition of the NPAAC requirements for the retention of laboratory records and diagnostic materials. This edition is substantially the same as the fourth edition, with only minor amendments to the fourth edition. Since the publication of the third edition, there have been significant developments in Australian laboratory practice. For example, all pathology laboratories are now required to maintain a formal quality system, and must be accredited to ISO 15189 (AS4633). In addition, new privacy principles and legislation have come into effect, legislation has clarified the status of retained human parts and tissues, and the Human Genetics Advisory Commission (HGAC) has been formed. To address these developments, NPAAC has completely revised the requirements for retention, and has adopted guiding principles to create a uniform and integrated approach to retention requirements."--Introduction, p. 1.
