Glamour Road Tom Dolle 2022-03-28 This highly visual book explores the seldom-told story of how glamour, fashion, design, and styling became the main focus of automotive marketing from the postwar 1940s through the 1970s. With the expansion of the American suburbs after WWII, women suddenly needed cars of their own. By adopting the fashion industry's yearly model changes, as well as hiring many designers and stylists from the fashion industry, the automobile industry made a direct appeal to the rising sophistication and influence of women. By perfecting the fashion-centric concept of planned obsolescence, it became the dominant economic engine of American postwar prosperity. The dramatic photography, elegant fashion, and use of color and materials in midcentury automotive marketing created a groundswell of demand for new cars. Much of the marketing imagery of the period hasn't been published since it first came out, and this book features some of the best.

Caddyshack Chris Nashawaty 2018-04-24 "In the summer of 1980, a group of authority-defying comedy geniuses from Saturday Night Live, the Second City improv troupe, and the National Lampoon magazine created the funniest sports movie ever made. Maybe the funniest movie ever made, period. This timeless snobs-versus-slobs story of working-class kids and the white-collar buffoons who make them carry their golf bags in the hot summer sun has sex, drugs, and one very memorable candy bar. But the movie we all know and love as a benchmark of comedic film didn't start that way, and everyone who made it certainly didn't have the word "classic" in mind as the cameras were rolling. The story of Caddyshack began, improbably, at Harvard University, when three editors of The Harvard Lampoon (Doug Kenney, Rob Hoffman, and Henry Beard) decided to unleash their revolutionary humor on the world at large and publish the National Lampoon. The magazine quickly became a cultural juggernaut, expanding from page to stage and attracting the talents of John Belushi, Chevy Chase, Gilda Radner, and Bill Murray. Together, they set American popular culture on fire, and the Lampoon team quickly turned to film. After Animal House became a box office blockbuster, the brilliant and drug-addled minds of the Lampoon turned their focus on a story from Bill and Brian Doyle-Murray's childhood summers spent working at Chicago country clubs. The making of Caddyshack turned out to be even crazier and funnier than the film, as this ragtag group of party animal filmmakers descended on a Florida country club to shoot the movie over three very memorable months. In [this book], Chris Nashawaty, film critic for

Entertainment Weekly, goes behind the scenes of the iconic film, chronicling the rise of comedy's greatest deranged minds as they turn the entertainment industry on its head and ultimately blow up both a golf course and popular culture as we know it. So, it's got that going for it ... which is nice."--Dust jacket.

Battle for the Beetle Karl Ludvigsen 2000-04-01 The untold story of the post-war battle for Adolf Hitler's giant Volkswagen factory and the Porsche-designed car that became an icon for generations around the globe. The Volkswagen was the showpiece of the achievements of Adolf Hitler's Third Reich. Backed by the Führer himself, it struck fear into the hearts of all who owned and managed Europe's car industry. Designed to "out-Ford Ford," the Beetle would dwarf their efforts with its low price and high production. After World War II what was to be the fate of this odd bug-shaped car and its colossal bomb-battered factory? View picture detail Legend has it that the victors underestimated the potential of the car that would become the automotive icon of several generations, indeed the world's most-famous and most-produced automobile. Karl Ludvigsen's interviews and researches in British, German, American, Australian and Belgian archives prove the contrary. His

hitherto-untold story of why and how they didn't get the factory makes revealing and engrossing reading. History buffs and followers of World War II and its aftermath will relish the way Ludvigsen depicts afresh the creation of the VW by renowned and "untouchable" engineer Ferdinand Porsche, the building of its factory by Hitler crony Robert Ley, "a notorious womanizer who drank too much," and the wartime career of the huge Wolfsburg plant as the prime contractor for the jet-powered V-1 flying bomb, the world's first successful cruise missile. Car enthusiasts who consider themselves well-read will be absorbed by Ludvigsen's disclosures of the national and company mindsets that affected their respective attitudes toward the radical Volkswagen. Most astonishing are his revelations of the deep interest of

Ford in the VW factory. Far from rejecting the VW plant, Ford proposed that it be merged with its existing German operations. But the executive charged with the mission (Ludvigsen reveals his identity) failed to follow through. Ludvigsen traces the Beetle's impact on the world of autos, from the Chevrolet Corvair and Hino Contessa to rear-engined Fiats, Skodas and Hillmans. We learn why the most startling decision made by VW chief Heinz Nordhoff was not to change his car's design. And we are brought right up to the 1998 launch of VW's New Beetle. For those who wish to comprehend its amazing impact on the auto market, *Battle for the Beetle* is the essential source.
